Personalized Recipe Suggestion Email

Assignment Brief:

GourmetGrocer, a well-known online grocery service, wants to send personalized recipe suggestion emails to their customers based on their past purchases. The email will include a recipe name, a list of ingredients, links to buy any missing items, and cooking instructions. The goal is to increase customer engagement by offering relevant, personalized content that encourages repeat purchases.

Requirements:

1. The email should dynamically display a recipe based on the customer's past purchases.
2. The ingredients list should include links to buy any missing items.
3. The email should include the customer's first name in the greeting.
4. The Developer team has kindly provided all the fields required for the dynamic content within the sending data extension.
5. Instructions link: www.gourmetgrocer.com/instructions/<recipe>
   (e.g. www.gourmetgrocer.com/instructions/hearty-rustic-italian-lasagna)

Instructions:

1. Use the provided sample data.

2. Clarify any ambiguities and make reasonable assumptions where necessary.

3. Use the correct AMPscript functions to clean, format, retrieve, and calculate the data as indicated in the template.

Sample Data:

DonorID	FirstName	LastPurchaseDate	PreferredCuisine	RecommendedRecipe	MissingIngredients
1001	john	2024-08-01	Italian	"Hearty Rustic Italian Lasagna"	Ricotta Cheese, Ground Beef
1002	sArAh	2024-07-29	Mediterranean	"Mediterranean Lemon Herb Chicken Skewers"	Lemon, Olive Oil
1003	Mike	2024-08-03	Asian	"Vegan Thai Coconut Curry"	Coconut Milk, Red Curry Paste
1004	Emma	2024-07-25	Seafood	"Tuscan Garlic Butter Salmon"	Fresh Dill, Salmon Fillets
1005	chloe	2024-08-02	Dessert	"Decadent Dark Chocolate Lava Cake"	Dark Chocolate, Heavy Cream
